

Page 18, line 14 ff, kindly amend the third paragraph, as follows:

B 1 There is further provided in accordance with a preferred embodiment of the present invention, a method for accumulating at least one sample of gas to be analyzed, wherein the end concentration of the accumulated samples is determined by the analyzer, and consisting of the steps of measuring the gas concentration, deciding whether to accumulate the at least one sample, calculating the content of the accumulated gas, and deciding whether to continue collecting further samples according to [the] whether the accumulated gas has reached a desired concentration and volume.
